

**LISTING OF CLAIMS**

- 1 1. (Currently amended) A non-viral DNA vector construct comprising  
2 an internal ribosomal entry site (IRES),  
3 a selection marker, and,  
4 a green fluorescent protein marker.
- 1 2. (Currently amended) A cell stably transfected with the non-viral DNA vector construct of  
2 claim 1.
- 1 3. (Original) The cell of claim 2 wherein said cell is a stem cell.
- 1 4. (Currently amended) A reagent for assessing biological processes in real time, comprising a  
2 sufficient quantity of cells stably transfected with the non-viral DNA vector construct of claim 1  
3 in a suitable carrier medium.
